2. Page Design

2.1 Page URL

/project/create

2.2 Inbound Interface

Component	Angular Interface	Rest API
Project (Edit mode)	getProject(projectId)	/api/project/{id}

2.3 Outbound Interface

Component	Angular Interface	Rest API	Navigation URL
Create Button	Create mode: createProject(project: Project) Edit mode: saveProject(project: Project)	Create mode: /api/project/create Edit mode: /api/project/save	/project/view/{id}

Cancel Button			Back to previous page
Upload Button	uploadImage() Popup window to choose file from local file system		

2.4 Page Content

Component	Requirement	CSS
Project		
Project Name *	Mandatory field	
Brief Description * (limit to 100 words)	Mandatory field Validation: max length = 100 words	
Detailed Description *	Mandatory field	
Image		
Address		
Remote Checkbox	default: checked If checked, address fields are disabled	
Address 1		
Address 2		
City		
State	Drop down	
Country	Drop down	
Zip		
Create Button	Create Mode: Display Create Button Edit Mode: Display Save Button The image file needs to be sent to backend to store in database. Study how to pass image file to backend.	
Cancel Button		
Upload Button		

3. Issues

3.1 Project Address

Should project has its own address, or, always use the organization address? Research how other sites behave.

3.2 Contact Information

Should we not allow email address and phone number, so that volunteers have to register and apply through web site instead of contacting nonprofit directly?

4. Future Iteration

4.1 Add Additional Project Information

Length, commitment, cause, etc
